# SAFE

## **A label you can rely on.**

We ask a lot from our clothing and textile products. Our clothing should be fashionable, functional and colourful. At the same time, it should be soft and pleasant to the skin and not scratch. Athletic apparel must absorb moisture, drawing it away from the skin quickly.

We take these features, and many more, for granted today. But so much of what consumers demand from their clothing and textiles could not be possible without the use of chemicals. But, it is crucial that harmful levels of chemicals are not used in our products or are not present in worrying concentrations. The monitoring of clothing and textiles products is important.

So that you as consumer can rest assured nevertheless, the STANDARD 100 by OEKO-TEX® was introduced in 1992 to help consumers feel confident that the products they buy have been checked for harmful substances. Only products which were successfully monitored on the basis of its comprehensive and strict human-ecological list of measures may be marked with the STANDARD 100 by OEKO-TEX® label.

# INDEPENDENT

## Give it a try.

Clothing and home textiles certified with the STANDARD 100 by OEKO-TEX® give consumers around the world confidence and offer high-level and effective product safety for chemical substances that are harmful to health.

- ✓ All elements of a textile product must meet the required OEKO-TEX® test criteria: this means that everything from fabric to zippers, sewing yarn, inner linings, foams, buttons, etc., have been verified.
- ✓ The STANDARD 100 by OEKO-TEX® test criteria are uniform across the globe and are updated at least once every year.
- ✓ STANDARD 100 by OEKO-TEX® testing and certification are carried out exclusively by independent testing institutes of the OEKO-TEX® Association.
- ✓ With the number on the label, you can verify the validity of the certification and of the testing for harmful substances under [www.oeko-tex.com/en/label-check](http://www.oeko-tex.com/en/label-check) at any time.

# RECOGNISED

Textiles and materials bearing the STANDARD 100 by OEKO-TEX® label can be found all over the world. Over 21,000 manufacturers in almost 100 countries have their products certified according to STANDARD 100 by OEKO-TEX®.

With over 200,000 certificates issued, the STANDARD 100 by OEKO-TEX® is the best known and most widespread test label for textiles tested for harmful substances in the world.

**For you, this means: effective consumer protection and easy shopping with the STANDARD 100 by OEKO-TEX®**
